PROFESSIONAL SUMMARY

Quantitative energy and data analyst with experience building analytical tools, improving data-quality and operational workflows, and translating complex regulatory and technical requirements into actionable insights. Proficient in Python, SQL, Excel, JavaScript, and geospatial analysis, with a background in energy systems and a focused interest in distributed energy resources, virtual power plants, and wholesale electricity markets.

EDUCATION

University of North Carolina at Chapel Hill, Chapel Hill, NC | May 2026

Master of Science in Information Science

Relevant Coursework: Information Analytics, Systems Analysis, Risk Management and Returns, Data Mining

University of North Carolina at Chapel Hill, Chapel Hill, NC | May 2025, with distinction

Bachelor of Science in Environmental Science - Quantitative Energy Systems Track | GPA: 3.69

Relevant Coursework: Sustainable Energy Systems, Environmental Modeling, Decision-Making and the Environment

SKILLS

Quantitative & Analytical: Python (pandas, NumPy, matplotlib, Django), SQL, R; time-series and exploratory data analysis, regression and scenario analysis, data validation and QA, risk and sensitivity analysis

Energy & Markets: Energy systems analysis, NPV and LCOE calculations, regulatory constraints

Tools & Programming: Microsoft Excel, JavaScript, ArcGIS, and QGIS

Development & Workflow Tools: GitLab, Git, VS Code, ChatGPT, Claude

EXPERIENCE

COSOLVE LLC, Remote | June 2026-Present

Data Analyst Intern

- Conduct research and benchmarking across energy, defense, infrastructure, and economic-development initiatives to support strategy, program design, and client-ready recommendations.
- Develop a standalone Django and Leaflet asset-map viewer for searching, filtering, and analyzing Virginia's unmanned-systems organizations, facilities, and capabilities.
- Build and maintain the company website using HTML, CSS, JavaScript, cPanel, and SFTP-based deployment workflows.

Center for Geospatial Information Technology, Blacksburg, VA | June 2026-Present

Geospatial Application Developer

- Develop and improve JavaScript dashboard components for a Django and PostgreSQL application used to analyze Virginia crash and roadway-safety data.
- Build data-table and roadway-analysis features using ES modules, reusable components, and GitLab-based development workflows.
- Translate analytical requirements into tested application functionality for state and local transportation-safety stakeholders.

Joules Accelerator, Remote | March 2026-June 2026

ARL to Scale Research Associate Intern

- Conduct market research and benchmarking to support refinement of Joules' startup commercialization-readiness framework.
- Synthesize findings and help develop templates, reporting tools, and program materials for startups and internal stakeholders.
- Leverage LLM tools to accelerate market research, synthesis, and program development while validating results.

Paces, Remote | October 2025-May 2026

Data Operations Intern

- Support client-facing digital screening products via analysis and standardization of regulatory and geospatial datasets.
- Collaborate with stakeholders to turn reporting needs into repeatable QA and documentation workflows.
- Evaluate data quality gaps and process inefficiencies, recommending improvements to reliability and usability.
- Use LLM tools to support research, documentation, and workflow development across regulatory and geospatial data.

Sonder Energy, Chapel Hill, NC | November 2023-August 2024

Land Siting and Research Intern

- Supported site selection and due diligence for 10–200 MW energy projects through GIS-based and regulatory analysis.
- Conducted structured reviews of state and federal regulations and summarized feasibility and risk implications.
- Synthesized complex regulatory and spatial inputs into concise decision-ready summaries for internal stakeholders.
